

Prelert Signs Reseller Cachet Software to Deliver Its Predictive Analytics Solutions for IT Operations to the United Kingdom

Leading UK-based IT management software provider to offer Prelert's Anomaly Detective, an advanced machine intelligence solution for Splunk Enterprise environments

FRAMINGHAM, Mass. – February 25, 2013 – [Prelert](#), the first company to provide 100 percent self-learning [predictive analytics solutions](#) to dramatically improve IT operations, today announced it has signed a reseller agreement with Cachet Software, a leading U.K.-based provider of software for improved automation and reduced operational risk in IT incident, problem, and release and deployment management. Cachet will now offer Prelert's [Anomaly Detective](#) for Splunk Enterprise environments to its customers in the United Kingdom. Anomaly Detective uses machine intelligence assistance to locate problematic behavior changes hidden in huge volumes of operations data, dramatically improving IT operations.

“We’ve assembled a portfolio of best-in-class IT solutions that are recognized and cited by leading industry analysts,” said Stuart Kenley, managing director at [Cachet Software](#). “We welcome the addition of Prelert and its leading predictive analytics technology to our solutions offerings. Prelert provides fast and efficient data analytics that help customers achieve the highest levels of availability and performance of their mission-critical IT systems.”

“By partnering with Cachet Software, Anomaly Detective joins an elite group of IT management solutions chosen for their technological prowess,” said Mark Jaffe, CEO of Prelert. “With Cachet, we have the opportunity to work with a leading provider of solutions focused on addressing companies’ IT performance issues and optimizing their IT environment to deliver cost savings that bolster the bottom line.”

The [recently announced](#) Anomaly Detective is easily downloadable software that installs in minutes as a tightly integrated application for Splunk Enterprise. Because it leverages recent advances in machine intelligence, Anomaly Detective is 100 percent self-learning and requires minimal configuration. Anomaly Detective recognizes both normal and abnormal machine behavior and, using highly advanced pattern recognition algorithms, identifies developing issues and provides detailed diagnostic data that enables IT experts to avoid problems or diagnose them as much as 90 percent faster than previously possible. Anomaly Detective augments existing IT expertise, empowering IT staff to spend less time mining data, reduce troubleshooting costs and improve compliance with service-level agreements – all of which contribute to a rapid return on investment.

About Prelert

The complex IT environments behind today's online applications and services generate more operations management data than a human can structure or analyze. Prelert is the first company to solve this problem by providing 100 percent self-learning predictive analytics solutions that augment IT expertise with machine intelligence assistance to dramatically improve IT operations. Prelert's patent-pending analytics automatically mine existing management tools to find answers hidden in huge volumes of operations data. Prelert products install in minutes, giving IT operations, application support and security personnel the ability to reduce diagnostic time by as much as 90 percent. Prelert empowers IT experts with machine intelligence. For more information, visit www.prelert.com.
