

## Prelert Partners With Reseller OPEN3S to Deliver Its Predictive Analytics for IT Operations in Spain and Andorra

FRAMINGHAM, Mass. – Oct. 21, 2013 – [Prelert](#), the first vendor to provide big data analytics applications, with a time to value measured in minutes and that enable IT and business professionals to quickly make everyday decisions, today announced it has signed a reseller agreement with OPEN3S, an open source and security products and services provider in Spain. OPEN3S will offer Prelert’s [Anomaly Detective](#) for Splunk Enterprise environments to its customers located in Spain and across the Iberian peninsula. Anomaly Detective uses machine intelligence assistance to locate problematic behavior changes hidden in huge volumes of operations data.

“As a partner and provider of Splunk and its operational intelligence technology, we see Prelert’s predictive IT analytics solution for Splunk as a tremendous value-add in our catalog of offerings,” said Juan F. Romero, business developer at OPEN3S. “Prelert enables companies to precisely analyze their IT operations data for abnormal behavior, helping them uncover the issues in their data that could potentially impact application performance and, ultimately, their business.”

“OPEN3S is a Splunk Powered Reseller, making them the best representative for our IT data analytics solution in Spain and the surrounding region,” said Karl Renneker, manager, channel development at Prelert. “OPEN3S brings superior, customer-focused services and support with every product deployment to help its customers best manage and optimize their environments.”

[Anomaly Detective](#) is easily downloadable software that installs in minutes as a tightly integrated application for Splunk Enterprise. Anomaly Detective is 100 percent self-learning and requires minimal configuration. It identifies developing issues and provides detailed diagnostic data that enables IT experts to avoid problems or diagnose them as much as 90 percent faster than previously possible.

### About OPEN3S

OPEN3S provides leading-edge technology for large enterprises. Based in Spain and with international customers in almost all verticals, OPEN3S offers innovative products and specialized services for computer information security and systems. From turnkey projects to managed services, the aim is always to achieve the highest levels of security, availability and scalability in critical and complex environments.
