

Prelert Partners with Paladion Networks to Deliver Its Predictive Analytics for IT Operations In India and the Middle East

FRAMINGHAM, Mass. – September 9, 2013 – [Prelert](#), the first company to provide 100 percent self-learning [predictive analytics solutions](#) to address the volumes of data generated by today’s IT systems, today announced it has signed a reseller agreement with Paladion Networks, a leading global provider of information risk management solutions. Paladion will include Prelert’s [Anomaly Detective](#) in its machine data analytics services and solutions offerings to customers in India and Middle East.

“Our partnership with Prelert is a strategic step that will enhance our existing data analytics portfolio with innovative technologies,” said Mr. Vinod Vasudevan, COO of Paladion Networks. “Paladion Networks will benefit from Prelert’s ability to identify the root cause of problems in applications and networks within a very short time.”

“Our partnership with Paladion Networks gives us the opportunity to work with a proven and industry-recognized leader in providing information risk management solutions,” said Karl Renneker, Manager, Channel Development at Prelert. “Paladion’s prominence in Asia and in major vertical industries will allow us to easily bring our predictive analytics for IT data solutions to those markets.”

[Anomaly Detective](#) uses machine intelligence assistance to locate problematic behavior changes hidden in huge volumes of operations data. It is 100 percent self-learning, identifying developing issues and providing detailed diagnostic data that enables IT experts to avoid problems or diagnose them as much as 90 percent faster than previously possible.

About Paladion

Paladion is a specialized and strategic partner for information risk management to leading organizations in industries such as BFSI, ITES, telecom, and manufacturing. Paladion is the largest and the fastest growing pure-play information security provider in Asia (as ranked in Deloitte Technology Fast 500 Asia Pacific and Technology Fast 50 India in 2006 through 2011).

Possessing over a decade of experience in the information risk management domain, Paladion actively serves over 700 customers across 30 countries, providing end-to-end information risk management solutions comprising security assurance, compliance, governance, monitoring and management services. Visit www.paladion.net for more information.

About Prelert

The complex IT environments behind today’s online applications and services generate more operations management data than a human can structure or analyze. Prelert is the first company to solve this problem by providing 100 percent self-learning predictive analytics solutions that augment IT expertise with machine intelligence assistance to dramatically improve IT operations. For more information, visit www.prelert.com.
